CONTENTS

NO. 1 FEBRUARY

G. Lefranc, Marie Paule Lefranc, A. N. Helal, K. Boukef, H. Chaabani, M. Sfar Gandoura and Erna van Loghem. Unusual heavy chains of human IgG immunoglobulins: rearrangements of the CH domain exons 1

P. C. Dubreuil, Danielle H. Caillol and F. A. Lemonnier. Analysis of unexpected inhibitions of T lymphocyte proliferation to soluble antigen, alloantigen and mitogen by unfragmented anti-I-A^k or anti-I-E/C^k monoclonal antibodies 11

J. P. Pandey, F. Ambrosch, H. H. Fudenberg, G. Stanek and G. Wiedermann. Immunoglobulin allotypes and immune response to meningococcal polysaccharides A and C 25

D. W. Dresser. Quantitative inheritance of heterophile rheumatoid factor responsiveness in mice 31

D. L. Greiner, R. W. Barton, I. Goldschneider and D. M. Lubaroff. Genetic linkage and cell distribution analysis of T cell alloantigens in the rat ... 43

Short Communications

D. J. Anstee, W. J. Mawby, S. F. Parsons, M. J. A. Tanner and C. M. Giles. A novel hybrid sialoglycoprotein in St^a positive human erythrocytes 51

G. L. Daniels and R. W. Knowles. A monoclonal antibody to the high frequency red cell antigen JMH 57

Book Reviewed 61

NO. 2 APRIL

Luba D. Tomaska and Ch. R. Parish. Inhibition of secondary IgG responses by monosaccharides: evidence for *I*-region control 63

R. W. Knowles, Y. Bai, G. L. Daniels and Winifred Watkins. Monoclonal anti-type 2 H: an antibody detecting a precursor of the A and B blood group antigens 69

S. B. Goldbard, Kathryn M. Verbanac and Carol M. Warner. Genetic analysis of *H*-2 linked gene(s) affecting early mouse embryo development 77

D. E. Gorcyca, Judith L. McIvor-Nayeri, P. H. Maurer and Carol M. Warner. The immune response of allophenic mice to the synthetic polymer GLϕ. III. Allotype analysis of ante-GLϕ antibody 83

C. J. Krco, A. L. Kazim, M. Z. Atassi and C. S. David. Genetic control of the immune response to haemoglobin. IV. Ly-1^+ T-cells and appropriate *non-H-2* genes are required for *in vitro* responses to α- and β-subunits of human adult haemoglobin 93

R. H. Notenboom, S. Dubiski, B. Cinader and P. W. Good. Allotype and charge-related differences in the immune response 101

Simone Mayer, M.-M. Tongio, A. Falkenrodt, B. Pfeiffer and J. P. Bergerat. Expression of HLA antigens on leukaemia cells 111

Short Communications

M. Lakdhar and Anna Senik. Equivalent decrease of H-2K^k and H-2D^k expression after vaccinia virus infection 121

G. Hauptmann, M. M. Tongio, J. Goetz, Simone Mayer, R. Fauchet, A. Sobel, C. Griscel, F. Berthoux, C. Rivat and Ursula Rother. Association of the C-2 deficiency gene (*C2*QO*) with the *C4A*4*, *C4B*2* genes 127

V. Stolc, H. W. Kunz and T. J. Gill III. Polymorphism of serum acid phosphatase in the rat 133

S. Yamamoto. Inhibitory activities of substances present in plant seeds and fruits against anti-Lewis agglutinins 137

R. Grubb, K. K. Christensen, P. Christensen and V. Lindén. Association between maternal *Gm* allotype and neonatal septicaemia with group B streptococci 143

NO. 3 JUNE

F. Shakib, K. James and D. Barr. Gm allotypes and IgG subclass levels in Iraqi arabs 149

T. Nurmi. The association of serum IgM and IgG levels with the number of X chromosomes in patients with abnormal number of X chromosomes 155

J. P. Pandey, G. G. Hunder, H. H. Fudenberg and C. B. Loadholt. Immunoglobulin allotypes in patients with giant cell arteritis and polymyalgia rheumatica 165

J. Badet, M. Lopez, B. Habibi, J. P. Cartron, A. Noel, D. Salmon, J. Seger and C. Salmon. Atypical transmission of ABO blood groups in a French family 169

C. Hammerberg. Detection of a *t*-complex antigen by secondary cell-mediated lymphocytotoxicity 179

P. Millot. Comparison of the segregation of sheep histocompatibility genes *OLA-A1*, *A8*, *B7*, *B9* and *OLX-5* in eighteen hamster × sheep fibroblast hybrid lines 185

O. A. Sant'Anna, V. C. A. Ferreira, M. H. Reis, M. Gennari, O. M. Ibañez, M. B. Esteves, D. Mouton and G. Biozzi. Genetic parameters of the polygenic regulation of antibody responsiveness to flagellar and somatic antigens of Salmonellae 191

BOOK REVIEWS 207

BOOKS RECEIVED 208

NO. 4 AUGUST

R. H. NEUBAUER, J. J. MARCHALONIS, B. C. STRNAD AND H. RABIN. Surface markers of Primate B and T lymphoid cell lines identified by antibodies to human and simian lymphocyte antigens 209

S. DUBISKI, L. CHARPENTIER AND G. D'AGOSTARO. *Basilae* kappa light chains of rabbit immunoglobulins 223

MARY MICHAELIDES AND I. F. C. MCKENZIE. The detection of public Ia antigens on the surface of B6-C.*H-2*^{bm12} blast cells 233

J. J. BONNER AND M. L. TYAN. Cleft palate susceptibility maps in two H-2 sub-regions, H-2K to 1-B and G to H-2D 243

T. MATSUZAWA AND B. CINADER. Accelerated development of Th-2 type of helper effect in MRL/MpJ-*lpr/lpr* and BXSB/MpJ mice 249

K. W. BEISEL, Y. M. KONG, K. S. J. BABU, C. S. DAVID AND N. R. ROSE. Regulation of experimental autoimmune thyroiditis: influence of non-*H-2* genes 257

D. BALLINARI, M. A. PIEROTTI, LAURA GRAZIOLO, MARIELLA CATTANEO, M. J. ROGERS AND G. PARMIANI. Biochemical analysis of a public H-2 specificity revealed by an anomalous reaction of an alloantiserum with a chemically induced C57BL/10 fibrosarcoma 267

C. F. SCHOTT AND B. MERCHANT. Murine *in vivo* carrier-specific IgG memory to DNP–Ficoll: variation among inbred strains 277

T. J. GILL III, H. W. KUNZ, D. J. SCHARD, J. L. VANDEBERG AND V. STOLC. Orientation of loci in the major histocompatability complex of the rat and its comparison to man and the mouse 281

NO. 5 OCTOBER

R. H. FRASER, A. C. MUNRO, A. R. WILLIAMSON, E. K. BARRIE, E. A. HAMILTON AND R. MITCHELL. Mouse monoclonal anti-N. I. Production and serological characterization 295

R. H. FRASER, A. C. MUNRO, A. R. WILLIAMSON, E. K. BARRIE, E. A. HAMILTON AND R. MITCHELL. Mouse monoclonal anti-N. II. Physicochemical characterization and assessment for routine blood grouping 303

Y. NAKAO, H. MATSUMOTO, T. MIYAZAKI AND N. R. FARID. IgG heavy chain allotypes (Gm) in atropic and goitrous thyroiditis 311

G. W. G. Bird, June Wingham, G. S. Nicholson, Diana A. Battey, H. G. Koster and Tessa Webb. Another example of a haemopoietic (twin) chimaerism in a subject unaware of being a twin 317

Nicole Sabolovic, Maria Wellman-Bednawska and D. Oth. H-2 influence on the severity of mouse hepatitis virus type 3-induced acute disease 323

S. Lazary, H. Gerber, A. L. de Weck and P. Arnold. Equine leucocyte antigen system. III. Non-MHC linked alloantigenic system in horses 327

Bengt Källén. Rats highly susceptible to experimental autoimmune encephalomyelitis obtained by crossing rats from strains with low susceptibility 335

C. R. Young and M. Z. Atassi. Genetic control of the immune response to myoglobin. IX. Overcoming genetic control of antibody response to antigenic sites by increasing the dose of antigen used in immunization 343

Short Communications

R. W. Knowles, Y. Bal, C. Lomas, C. Green and P. Tippett. Two monoclonal antibodies detecting high frequency antigens absent from red cells of the dominant type of Lu(a-b-) Lu:-3 353

D. N. Propert, C. C. A. Bernard and M. J. Simons. Gm allotypes and multiple sclerosis 359

Book Reviews 363

NO. 6 DECEMBER

C. Davrinche, C. Rivat, L. Rivat-Peran, M. H. Cazes and A. Chaventre. A new fast variant (*BF*FO8*) of the BF polymorphism 367

Karen Artzt, Marilyn Lockwood, Dorothea Bennett, H. W. Kunz and T. J. Gill III. Serological evidence for a partial *t*-haplotype in the rat 371

S. F. Parsons, P. A. Judson and D. J. Anstee. BRIC 18: A monoclonal antibody with a specificity related to the Kell blood group system 377

B. M. De Jongh, W. M. A. Verhoeven, J. M. Van Ree, D. De Wied and J. J. Van Rood. HLA and the response to treatment with γ-type endorphins in schizophrenia 381

Janis Kennard and D. Meruelo. Precise mapping of the gene for L*y*-21.2 on the 7th chromosome 389

M. A. Horton, H. A. W. O'Brien and F. Takei. Further analysis of the L*y*-6 genetic region: Isolation and characterization of cell lines with altered expression of L*y*-6 antigens 397

ORMELLA MARELLI, CARLA TESTORELLI, G. CANTI, H. FESTENSTEIN AND A. NICOLIN. Immunological cross-reactivity between H-2D^k product and DTIC-treated H-2^d lymphoma 407

J. SELLEI. Natural agglutinins to hidden membrane components in the bovine erythrocytes 413

W. Y. LANGDON, I. F. C. MCKENZIE AND G. R. SHELLAM. Ly- and ecotropic MuLV antigens are separate entities 423

T. W. JUNGI, H. W. KUNZ, T. J. GILL III AND RUTH JUNGI. Genetic control of cell-mediated immunity in the rat. II. Sharing of either the *RT1.A* or *RT1.B* locus is sufficient for transfer of antimicrobial resistance 433

T. W. JUNGI, T. J. GILL III, H. W. KUNZ AND RUTH JUNGI. Genetic control of cell-mediated immunity in the rat. III. T cells restricted by the *RT1.A* locus recognize viable *Listeria* but not isolated bacterial antigens 445

A. R. ZEIGER AND P. H. MAURER. Immunogenicity of four sequential polypeptides in inbred guinea-pigs and their recognition at the T lymphocyte and antibody levels 457

G. W. LITMAN, JOANNE S. STOLEN, H. O. SARVIS AND O. MAKELA. The range and fine specificity of the anti-hapten immune response: Phylogenetic studies 465

M. A. LYNES, MARGARET KARL, KATHLEEN DIBIASE AND LORRAINE FLAHERTY. Supramolecular relationships of membrane antigens of the murine thymocyte .. 475
